

DEEPAL K50 REEV

Touch the Future

Deepal was created with one simple belief: the future of mobility should be as smart as it is human. As Changan's digital-first transportation brand, Deepal reimagines driving through the lens of possibility - building vehicles that are not just electric, but connected, intuitive, and alive with innovation.

At the heart of Deepal lies a revolutionary symbol - a seamless fusion of nature, humanity and technology. It's a beacon of limitless progress, guiding us toward an era where vehicles adapt to your lifestyle, speak your language, and respond to your needs.

From cutting-edge product design to personalized, intelligent in-car experiences, Deepal delivers more than just a drive - it delivers a digital journey. With every mile, we're building a low-carbon, deeply connected world powered by empathy, imagination, and technology.

COMMAND THE ROAD

The Deepal Hunter K50 REEV isn't just a pickup it's a visionary leap forward, blending sophisticated urban elegance with **raw, electrified power**. Its bold, shark-nose front fascia is instantly recognisable on the road and effectively **reduces wind resistance** while improving driving stability. Sculpted body lines seamlessly blend aerodynamic precision with muscular presence. Every surface has been shaped with intention, every angle designed to cut through Caribbean heat and headwinds with effortless style.

BUILT FOR THOSE WHO LEAD

SIGNATURE LED HEADLIGHTS WITH DRL

Vertically stacked headlamps connect to a full-width horizontal daytime running lights ensuring you see and are seen.

AERO-EFFICIENT CYBER GRILLE

Projects modern sophistication and optimizes airflow to maximize your electric range.

AERODYNAMIC BODY PROFILE

Optimises drag efficiency.

C-SHAPED LED REAR LAMPS

Provides high-visibility presence on the road to improve driving safety.

STEP BARS

Provide easy cabin access.

CARGO BED

Heavy-duty bed anchors and a functional bedliner keep your cargo secured and your truck 1,590(L) x 1,580(W) x 490(H) bed protected.

A detailed view of the front interior of a Deepal Hunter K50 SUV. The image shows the driver's side with a black leather steering wheel featuring the Deepal logo. Behind the wheel is a large, curved digital instrument cluster. To the right, a wide panoramic screen displays navigation and vehicle information. The dashboard and center console are finished with a combination of black and beige materials, including leather-like stitching on the seats and door panels. The center console has a gear shifter and handbrake. The view through the windshield shows a lush green landscape with trees under a clear sky.

LUXURY MEETS EVERYDAY UTILITY

The Deepal Hunter K50 welcomes you into a clean, horizontal cabin architecture that feels closer to a premium SUV. Layered dashboard surfacing combines durable materials with refined trim details, creating a cockpit that's modern but built for hard work. A sophisticated colour palette adds warmth and spaciousness, while ambient lighting sets the mood for every journey.

PREMIUM DETAILS

MIRROR LAKE SMART DUAL SCREEN

A wide, uncluttered layout creates a clear and unobstructed view.

MULTI-TEXTURE PREMIUM MATERIALS

Textured panels create a premium feel you'll enjoy.

SOPHISTICATED BLACK-BEIGE INTERIOR PALETTE

Brightens the cabin and enhances the feeling of space while resisting heat absorption.

The Deepal Hunter K50 REEV Plus AWD is built for real Caribbean driving-heat, traffic, longer journeys, and full cabins. **Everyone gets a more relaxed ride**, from the driver's seat to the back row.

DESIGNED FOR LASTING COMFORT

6-WAY POWER DRIVER SEAT

Less fatigue on longer drives; more comfort on daily commutes.

VENTILATED FRONT SEATS

Circulates cool air through the seat surface, combating Caribbean heat so you arrive composed and dry.

DUAL-ZONE CLIMATE CONTROL WITH REAR A/C VENTS

Personalized comfort for driver and passengers alike.

REEV ACOUSTIC EXCELLENCE

The near-silent REEV drivetrain and advanced sound insulation create a calm, relaxing environment.

SPACE THAT WORKS FOR YOU

With the column-mounted gear selector freeing up the centre area, you gain storage where you'll actually use it, **keeping everyday items close and clutter under control**. A foldable rear bench expands flexibility for bigger loads, while multiple USB ports keep everyone powered up on the move. The 40W wireless charger makes “low battery” one less thing to worry about.

COLUMN-MOUNTED GEAR SELECTOR & OPEN CENTRE CONSOLE

Gives you a wider, more usable console with integrated grab handles and storage.

40W WIRELESS CHARGER & MULTIPLE USB PORTS

High-speed charging means your device is ready when you arrive.

FOLDABLE REAR BENCH

Rear seats fold up to reveal extra floor space for secure, weather-protected storage.

**YOUR WHISPER-QUIET RETREAT
FROM THE CARIBBEAN HEAT**

ELECTRIC POWER. EXTENDED RANGE

Range-Extended Electric Vehicle (REEV) technology lets you enjoy electric driving daily, while staying confidently covered for longer journeys. The addition of an engine called a **range extender** to an electric vehicle, does not directly drive the wheels but **only generates electricity. When the battery runs out of power, it will start the internal combustion engine to charge the battery.** Once the battery is charged, it will continue to drive the vehicle.

A SMARTER WAY TO DRIVE

6-WAY POWER DRIVER SEAT

Less fatigue on longer drives; more comfort on daily commutes.

REEV TECHNOLOGY

EV smoothness and silence with the range freedom of a fuel tank behind it.

DUAL-MOTOR INTELLIGENT AWD

More confidence across mixed road conditions, from wet corners to uneven ground.

RAPID DC FAST CHARGING

Spend less time waiting and more time moving; the high-performance LFP battery can charge from 30% to 80% in just 30 minutes.

900+ KM COMBINED RANGE

The freedom to plan your day around life, not charging points. Up to 131 km on pure electric power for daily commutes and short runs. Over 900 km total when the range extender and 70-litre tank are working together.

THE PICK-UP THAT RUNS ON INTELLIGENCE

The technology doesn't stop at the powertrain. Every surface, every control, every sensor in the Hunter K50 REEV Plus AWD has been designed to make your drive more **effortless, more connected, and more confident.**

YOUR CONNECTED COMMAND CENTER

12.3-INCH CENTRAL TOUCHSCREEN

Our ultra-responsive hub for media, navigation, and vehicle settings.

7.5-INCH FULL-COLOUR LCD INSTRUMENT CLUSTER

The driver display gives you real-time visibility into speed, navigation prompts, energy flow, remaining electric range, and driver assistance alerts. All customizable to show what matters most.

MULTI-FUNCTION STEERING WHEEL

with Shortcut Buttons Intuitive. Immediate. Effortless. Steering-mounted shortcut buttons let you manage cruise control, audio volume, voice commands, phone calls, and driver assistance features with a simple thumb press.

THE HUNTER K50 INTELLIGENCE SUITE

3D AROUND VIEW CAMERA WITH TRANSPARENT CHASSIS

Delivers a panoramic, real-time perspective of your surroundings while revealing the terrain beneath your vehicle.

INTELLIGENT VOICE CONTROL

Command your vehicle's features hands-free for maximum safety.

SMARTPHONE INTEGRATION

Wireless Apple CarPlay and Android Auto keep your life synced.

SMART KEY SYSTEM

Keyless entry and start for a seamless, premium transition into your day.

RAIN SENSORS

Wipers respond automatically to sudden showers.

OVER-THE-AIR SOFTWARE UPDATES

Your vehicle software improves over time, keeping your ownership experience future-ready.

RANGE-EXTENDED ELECTRIC POWERTRAIN

Electric every day, unlimited range when you need it.

PROTECTED BY INTELLIGENCE

The Deepal Hunter K50 REEV Plus AWD introduces a comprehensive approach to safety: **intelligent prevention**. Level 2+ Advanced Driver Assistance Systems (ADAS) work silently in the background of every drive, monitoring blind spots you can't see, watching for hazards you haven't noticed yet, calculating stopping distances before your brain processes the brake pedal. This isn't just a safer pick-up truck. It's a co-pilot that never looks away, never gets distracted, and never gets tired.

Cameras, radar sensors, and artificial intelligence work together to create a protective sphere around your vehicle watching every direction, processing thousands of data points per second, ready to intervene the instant they detect danger.

Explore the layers of protection that make the Hunter K50 the most intelligent guardian on the road today

Proactive Intelligence
Stopping Accidents Before They Start.

Built to Protect
A Fortress for Your Most Precious Cargo.

360° Awareness
Mastering Your Environment.

PROACTIVE INTELLIGENCE:

AUTOMATIC EMERGENCY BRAKING (AEB) & FORWARD COLLISION WARNING

If a collision is imminent, the system alerts you and can automatically apply the brakes to mitigate or avoid the impact entirely.

ADAPTIVE CRUISE CONTROL (ACC)

Set your speed, and the Hunter K50 automatically maintains a safe distance from the car in front, braking and accelerating smoothly to match the flow of traffic.

LANE DEPARTURE WARNING & LANE KEEP ASSIST

If you begin drifting without signaling, the system provides a gentle steering correction to guide you back into your lane. If the drift is more aggressive, Lane Departure Warning activates with audible and visual alerts.

BLIND SPOT MONITORING (BSM) WITH REAR CROSS TRAFFIC ALERT

Sensors constantly scan your “no-zone,” alerting you to hidden vehicles before you change lanes or back out of a crowded parking spot at the mall.

ELECTRONIC STABILITY CONTROL (ESC) + TRACTION CONTROL SYSTEM (TCS)

If the system detects a loss of control - understeer, oversteer, skidding - ESC automatically applies braking to individual wheels and adjusts engine power to bring you back on course. TCS prevents wheel spin during acceleration on slippery surfaces. Combined with the AWD system's intelligent torque distribution, you maintain grip and control even when the road tries to take it away.

HILL START ASSIST + HILL DESCENT CONTROL

Hill Start Assist holds brake pressure for two seconds after you release the pedal, giving you time to transition smoothly to the accelerator without rolling backward. Hill Descent Control maintains a controlled, steady speed without you having to ride the brakes, preventing brake fade and maintaining control.

BUILT TO PROTECT: A FORTRESS FOR YOUR MOST PRECIOUS CARGO

BODY STRUCTURE & MATERIALS

High-strength steel and engineered crumple zones absorb impact energy, while a reinforced cabin safety cell shields occupants.

SPECIALIZED REEV BATTERY PROTECTION

The LFP battery is encased in a high-strength, puncture-resistant protective frame and strategically placed within the chassis to be shielded from impact zones. In the event of a significant collision, the system automatically triggers a high-voltage disconnect to ensure the vehicle remains safe for occupants and first responders.

COMPREHENSIVE AIRBAG SYSTEM

Airbags form a protective cocoon, (front, side, curtain) ensuring every passenger is shielded in multiple impact scenarios.

ISOFIX CHILD SEAT ANCHORS + REAR SAFETY

With integrated ISOFIX child seat anchors, you can secure your youngest passengers with professional-grade stability. The reinforced rear doors and child safety locks ensure that your “backseat drivers” stay protected.

360° AWARENESS: MASTERING YOUR ENVIRONMENT

3D AROUND VIEW CAMERA WITH TRANSPARENT CHASSIS

Uses four wide-angle cameras mounted around the vehicle (front, rear, and both sides) and stitches their feeds together into a single, seamless bird's-eye view including a “transparent chassis” mode that lets you see potholes or rocks directly beneath the vehicle.

FRONT & REAR PARKING SENSORS

Combined with the camera system, you have both visual and audible confirmation of your surroundings.

LIGHTING & VISIBILITY

LED headlights with auto high beam, daytime running lights, and fog lamps ensure clarity on unlit rural roads and sudden downpours. DRLs ensure you're noticed before anyone needs to react to you.

DRIVER ATTENTION MONITORING + FATIGUE DETECTION

Uses sensors to track steering patterns, lane position, and driving behavior. If the system detects signs of drowsiness or distraction erratic steering inputs, drifting between lanes, delayed reactions, it triggers a visual and audible alert suggesting you take a break.

TIRE PRESSURE MONITORING (TPMS)

Real-time alerts on your 7.5-inch cluster ensure you never drive on a dangerous or inefficient tire.

The Deepal Hunter K50 REEV Plus AWD doesn't just meet safety standards. It redefines what protection means in a pick-up truck. Every system is active. Every system is working for you. You focus on driving. Intelligence handles the rest.

ELECTRIC POWER REDEFINED

From the moment you press the accelerator, maximum torque is available instantly, delivering effortless launches, confident towing, and smooth acceleration. This isn't just performance, it's refinement. Silent operation, linear power delivery, and intelligent drive modes make every journey more capable and more enjoyable.

PERFORMANCE

Total System Torque: 470 Nm (Instant Electric Delivery)
Power Output: 200 kW Dual-Motor System
Acceleration: 0-100 km/h in approx. 7.9 seconds
Towing Capacity: 2,500 kg (Estimated)
Payload: 800 kg+ Reinforced Cargo Bed

INTELLIGENT ALL-WHEEL DRIVE MODES

Five intelligent drive modes adapt effortlessly to any terrain:
Sport: Spirited highway driving.
Off-Road: Controlled torque delivery for loose or uneven terrain.
Eco: Maximum range for daily commutes.
Snow: Confidence in slippery conditions.
Custom: Tailor performance to your preference.

CAPABILITY WITHOUT COMPROMISE

RANGE & EFFICIENCY

Daily commutes run silently on pure electric power-up to ~131 km. For longer journeys, the generator engine extends range seamlessly, delivering 900+ km total.

AWD & OFF-ROAD PERFORMANCE

Electric AWD responds in milliseconds faster than mechanical systems. Torque flows instantly to the wheels that need it, pulling you through muddy Toco roads, steep estate climbs, or river crossings.

TOWING PERFORMANCE

REEV torque makes towing effortless. Instant power at low speeds gives you control on slippery ramps. On the highway, trailer sway control and regenerative braking keep loads stable and safe, even downhill.

REGENERATIVE BRAKING CONTROL

The electric motors help slow the vehicle down, saving your brake pads and recharging your battery at the same time.
